Project Description/Justification:

This program provides funds to Alaskan nonprofit service providers and housing developers to increase housing opportunities to AMHTA beneficiaries and other special needs populations in Alaska through pre-development and development activities. These funds will continue to assist in developing community-based supportive housing in conjunction with the Homeless Assistance Program.

An analysis of six supportive housing properties funded through this program, several years ago, showed an average daily expense of \$51 a day compared to \$142 in prison and over \$1,100 a day in the Alaska Psychiatric Institute (API).

The demand for special needs housing remains critical. The AMHTA has made housing one of its five focus areas for funding. The Alaska Independent Living Council, and other special needs advocacy groups, has identified supportive housing as a top priority in their statewide planning efforts. The target populations consist of mental health beneficiaries and other special needs groups like severely emotionally disturbed children and the homeless.

To optimize leveraging of these funds with other federal grant and tax credit programs and to expedite the release of funding to nonprofit housing developers, AHFC administer these housing development funds in conjunction with other resources to the greatest extent possible. This enables AHFC to administratively streamline housing development projects, which also may intend to borrow money from AHFC.

Examples of special needs housing includes, but are not limited to:

- Congregate housing for people with mental illness or developmental disabilities;
- Supportive housing for victims of domestic violence;
- Supportive housing, including assisted living, for people with mental illness, developmental disabilities, or multiple disorders;
- Transitional housing with support services for newly recovering alcoholics and addicts; and
- Permanent or transitional housing support for the homeless and AMHTA beneficiaries.

The loss of these funds may increase expenditures by the state to house people who are inappropriately-housed in the Alaska Psychiatric Institute (API) or the correctional system. The cost of providing community-based care is significantly lower than institutional care. Another negative effect is the loss of leveraging opportunities with other federal grant programs.

Funding will continue to serve populations with special housing needs. This program provides funds to Alaskan nonprofit service providers to increase housing opportunities for Alaska Mental Health Trust Authority (AMHTA) beneficiaries and other special needs populations throughout the state. The funds may be used for housing development and/or services designed to achieve long-term residential stability.

The projected outcomes are to:

- Support the operations of 17 congregate housing properties for victims of domestic violence, people with mental illness or developmental disabilities, and chronically homeless Alaskans;
- Reduce recidivism among clients spending time in institutions;
- Provide supportive housing, including assisted living, for people with mental, physical, or developmental disabilities, or multiple disorders; and
- Provide transitional housing with support services for newly recovering alcoholics and addicts.

Use of budget fund code 1268 directs expenditure of money held in reserve in the Mental Health Trust Settlement Income Account in excess of the amount directed for use by the Trust through annual

recommendations (state accounting system fund 3321). Per AS 37.14.041(b) money in excess of the amount needed to meet the necessary expenses of the state's integrated comprehensive mental health program shall be transferred to the general fund and used for any public purpose. To ensure these monies are expended to the benefit of the state's mental health program and not swept to the general fund, a portion of the reserves are being utilized to fund various mental health programs and Trust recommendations with the intent of drawing reserves down over a period of five years.
